

Certificated BLS/CPR & AED Training

The purpose of this Level 2 Award in Cardiopulmonary Resuscitation and Automated External Defibrillation is to provide the learner with the skills, knowledge and understanding in the provision of Cardiopulmonary Resuscitation and of the safe use and management of an Automated External Defibrillator. This qualification offers the trained provider the opportunity to provide effective emergency lifesaving first aid care using an AED. This is achieved through the understanding of the BLS/AED algorithm and the responsibilities and treatment principles of AED use.

This course covers Basic Life Support skills and includes skills for Adult, Child and Infant as well as healthcare variations on infant CPR. The course includes: Safety, precautions, initial assessment, recovery position, CPR, compression only CPR, CPR handover and choking. This is ideal for nurses, care workers or medical professionals needing annual updates to complete professional membership.

AED training is also included in the course. Learning AED skills is becoming more important with the increase in the numbers of units in the community and workplace. They are easy to use with a little training and make a real difference in the chance of survival to someone in cardiac arrest. If you have already completed any other first aid course you will understand the importance of prompt use of an AED making this an ideal next course to take to develop your skills.

All our first aid courses fully meet the UK and European Resuscitation Council Guidelines 2015 as per the HSE requirements.

This comprehensive on line course gives complete flexibility as to who sits the course, when and where. Once completed the trainee prints out their own certificate and CPD statement.

Key Benefits:

- View the course on any device and you can start on one device then finish on another (PC, Mac, Phone or Tablet).
- Tutor support available by phone, email or online chat during office hours making it more than just an online course.
- All students receive a login area to manage their training.
- Downloadable course support material including student manual.
- Access to the course even after student has passed allows for the course to be used as a reference/refresher.
- Students can choose to receive weekly video update emails to keep skills fresh.
